

The Andre Felix National Park is a national park found in Central African Republic, contiguous to Radom National Park in Sudan.[1] It was established in 1960 and its area is 951 km².^[1]

Park consists of a lowland, a fairly open forest in the northern half, with a densely forested, elevated southern sector.^[2]

It is home to a jungle forest savannah with Bambusa, Isoberlinia and Terminalia.

The main species of fauna found are ostriches, buffaloes, crocodiles, elephants, giraffes, hippos, lions, panthers, wild boars among others.
