

Coordinates: 28°37'23"N 31°17'11"E

Sannur Cave was discovered in the 1980s after blasting in a quarry created an entrance. It is 10 km (10 mi) southeast of the city of Beni Suef.

It has only one chamber which is about 700 m (2,300 ft) long and 15 m (50 ft) in diameter.

It is a limestone cave overlaid with alabaster created by thermal springs. Its unique geology and beautiful formations of stalactites and stalagmites led it to being recognized as a Protected Area in 1992.[1]
